

Outbreak response science training series: Primer

The School of health policy and planning studies, Trivandrum under the KUHS is planning to deliver series of classes on Outbreak response science the details of which is given below

Name of the course:

Outbreak response epidemiology in the context of Covid-19 Pandemic: A primer

Proposed date and duration:

From 15-5-2020 Six sessions one hour each

Expected participants:

Faculty from affiliated institutions under KUHS. Those who have undergone the Certificate course in research methodology/certificate course in Biostatistics/Bioethics will be given preference for course registration. Young researchers at the level of Asst. professor/Associate professor will be also given preference. As this is planned as online or out of usual duty hours No objection certificate from employer is not needed.

Course outline:

Each one consists of a module lasting 30 minutes delivery of the content and discussion on Zoom platform to be arranged following that session with in three days. The modules are

1. Importance and introduction to outbreak science epidemiology, Field epidemiology
2. Identification of research problem and developing the research question in the context of outbreak response science
3. How methodology matters with critical review of published Covid-19 literature
4. Need of multidisciplinary and collaborative research
5. Proposal writing, Seeking funds and listing of source of funding
6. Ethical considerations in Outbreak response epidemiology

Those who are interested may register in the link provided with the following details on or before 10-5-2020
