Second Year B.Sc Optometry Degree Examinations October 2018 Visual Optics (2016 Scheme) Time: 2 hours Answer all questions Draw diagrams wherever necessary Essay (10) Streak retinoscopy – principle, technique and uses in optometry Short Notes: Presbyopia AC / A ratio Prisms Answer briefly Shapp's rule and its application Relationship between accommodation and convergence Difficulties in subjective and objective refraction tests Cardinal points Colour vision Fill in the blanks (5x1=5) 10. Difference in spherical equivalents between the two eyes is termed Progression of myopia. 12. The angle between the pupillary axis and the visual axis is termed Title In the line connecting the fivation terrest and Progression of Myopia.	QP Code: 226013	Reg. No:	
(2016 Scheme) Time: 2 hours Answer all questions Draw diagrams wherever necessary Essay (10) 1. Streak retinoscopy – principle, technique and uses in optometry Short Notes: (3x5=15) 2. Presbyopia 3. AC / A ratio 4. Prisms Answer briefly 5. Knapp's rule and its application 6. Relationship between accommodation and convergence 7. Difficulties in subjective and objective refraction tests 8. Cardinal points 9. Colour vision Fill in the blanks (5x1=5) 10. Difference in spherical equivalents between the two eyes is termed 11. Administration of	Second Year B.Sc Opto	metry Degree Examinations October 2018	
Time: 2 hours Answer all questions Draw diagrams wherever necessary Essay (10) 1. Streak retinoscopy – principle, technique and uses in optometry Short Notes: (3x5=15) 2. Presbyopia 3. AC / A ratio 4. Prisms Answer briefly 5. Knapp's rule and its application 6. Relationship between accommodation and convergence 7. Difficulties in subjective and objective refraction tests 8. Cardinal points 9. Colour vision Fill in the blanks (5x1=5) 10. Difference in spherical equivalents between the two eyes is termed 11. Administration of	Visual Optics
