Time: 3 hrs

Max marks:100

- ***Answer all questions***
- ***Draw diagrams wherever necessary***

Essay: (20)

1. A 20 years old presents to you with history of swelling in front of the neck for the past one month. You find that she has an enlarged thyroid gland. Answer the following:
 - Discuss the details of history that you would ask to assess the patient.
 - What clinical features would you examine for. What findings would make you suspect a malignant swelling.
 - List the investigations to assess the patient.
 - How will you manage if she has a solitary nodule of the thyroid. (5+5+3+7)
