2010 Scheme

First Professional MBBS Degree Supplementary Examinations July 2022 Anatomy - Paper I Time: 3 Hours Answer all guestions to the point neatly and legibly - Do not leave any blank pages between answers - Indicate the guestion number correctly for the answer in the margin space Answer all parts of a single question together - Leave sufficient space between answers Draw table/diagrams/flow charts wherever necessary Long Essay (10) 1. An 80 years old lady had a fall and on examinations had pain and swelling in the left hip region with restriction of movements of hip joint. X-ray revealed fracture of neck of femur. Answer the following questions: Mention the features of the articulating regions of the bones forming hip joint Name the ligaments of the joint mentioning the muscles which produce them Mention the blood supply of the joint Hention the complications, possible to develop in the above patient (3+2+3+1+1) Short essays Development of right atrium Radio-ulnar joints. Pericardium Short notes Structures passing deep to extensor retinaculum of hand and its deep relations Arterial anastomosis around elbow joint Boundaries and contents of femoral triangle Short answer Arterial anastomosis around elbow joint Boundaries and contents of femoral triangle Short answer (3x2=6) Dewolopment Draw diagrams (2x2=4) Medial surface of left lung	Q.P. Code: 101001	Reg. no.:
Time: 3 Hours Answer all questions to the point neatly and legibly • Do not leave any blank pages between answers • Indicate the question number correctly for the answer in the margin space Answer all parts of a single question together • Leave sufficient space between answers Draw table/diagrams/flow charts wherever necessary Long Essay (10) 1. An 80 years old lady had a fall and on examinations had pain and swelling in the left hip region with restriction of movements of hip joint. X-ray revealed fracture of neck of femur. Answer the following questions: • Mention the features of the articulating regions of the bones forming hip joint • Name the ligaments of the joint with its attachments • List the movements of the joint mentioning the muscles which produce them • Mention the blood supply of the joint • Mention the complications, possible to develop in the above patient (3+2+3+1+1) Short essays (3x5=15) 2. Development of right atrium 3. Radio-ulnar joints. 4. Pericardium Short notes (5x3=15) 5. Implantation 6. Down syndrome 7. Structures passing deep to extensor retinaculum of hand and its deep relations 8. Arterial anastomosis around elbow joint 9. Boundaries and contents of femoral triangle Short answer (3x2=6) 10. Blood supply of mammary gland 11. Epiphysis 12. Transitional epithelium Draw diagrams (2x2=4) 13. Transverse section through middle of leg	First Professional MBBS Degree Supplementary Examinations July 2022	
 Answer all questions to the point neatly and legibly • Do not leave any blank pages between answers • Indicate the question number correctly for the answer in the margin space Answer all parts of a single question together • Leave sufficient space between answers Draw table/diagrams/flow charts wherever necessary Long Essay (10) 1. An 80 years old lady had a fall and on examinations had pain and swelling in the left hip region with restriction of movements of hip joint. X-ray revealed fracture of neck of femur. Answer the following questions: Mention the features of the articulating regions of the bones forming hip joint Name the ligaments of the joint with its attachments List the movements of the joint mentioning the muscles which produce them Mention the blood supply of the joint Mention the blood supply of the joint Mention the complications, possible to develop in the above patient (3+2+3+1+1) Short essays (3x5=15) 2. Development of right atrium 3. Radio-ulnar joints. 4. Pericardium Short notes (5x3=15) 5. Implantation 6. Down syndrome 7. Structures passing deep to extensor retinaculum of hand and its deep relations 8. Arterial anastomosis around elbow joint 9. Boundaries and contents of femoral triangle Short answer (3x2=6) 10. Blood supply of mammary gland 11. Epiphysis 12. Transitional epithelium Draw diagrams (2x2=4) 13. Transverse section through middle of leg 	Anatomy - Paper I	
1. An 80 years old lady had a fall and on examinations had pain and swelling in the left hip region with restriction of movements of hip joint. X-ray revealed fracture of neck of femur. Answer the following questions: • Mention the features of the articulating regions of the bones forming hip joint Name the ligaments of the joint with its attachments • List the movements of the joint mentioning the muscles which produce them Nention the blood supply of the joint Mention the down supply of the joint • Mention the complications, possible to develop in the above patient (3+2+3+1+1) Short essays (3x5=15) 2. Development of right atrium 3. Radio-ulnar joints. 4. Pericardium Short notes (5x3=15) 5. Implantation 6. Down syndrome 7. Structures passing deep to extensor retinaculum of hand and its deep relations 8. Arterial anastomosis around elbow joint 9. Boundaries and contents of femoral triangle Short answer (3x2=6) 10. Blood supply of mammary gland 11. Epiphysis 12. Transitional epithelium Draw diagrams (2x2=4) 13. Transverse section through middle of leg	 Answer all questions to the point neatly and legibly • Do not leave any blank pages between answers • Indicate the question number correctly for the answer in the margin space Answer all parts of a single question together • Leave sufficient space between answers Draw table/diagrams/flow charts wherever necessary 	
 Development of right atrium Radio-ulnar joints. Pericardium Short notes (5x3=15) Implantation Down syndrome Structures passing deep to extensor retinaculum of hand and its deep relations Arterial anastomosis around elbow joint Boundaries and contents of femoral triangle Short answer (3x2=6) Blood supply of mammary gland Epiphysis Transitional epithelium Draw diagrams (2x2=4) Transverse section through middle of leg 	 hip region with restriction of movements of hip joint. X-ray revealed fracture of neck of femur. Answer the following questions: Mention the features of the articulating regions of the bones forming hip joint Name the ligaments of the joint with its attachments List the movements of the joint mentioning the muscles which produce them Mention the blood supply of the joint 	
3. Radio-ulnar joints. 4. Pericardium Short notes (5x3=15) 5. Implantation 6. Down syndrome 7. Structures passing deep to extensor retinaculum of hand and its deep relations 8. Arterial anastomosis around elbow joint 9. Boundaries and contents of femoral triangle Short answer (3x2=6) 10. Blood supply of mammary gland 11. Epiphysis 12. Transitional epithelium Draw diagrams (2x2=4) 13. Transverse section through middle of leg	Short essays	(3x5=15)
 5. Implantation 6. Down syndrome 7. Structures passing deep to extensor retinaculum of hand and its deep relations 8. Arterial anastomosis around elbow joint 9. Boundaries and contents of femoral triangle Short answer (3x2=6) 10. Blood supply of mammary gland 11. Epiphysis 12. Transitional epithelium Draw diagrams (2x2=4) 13. Transverse section through middle of leg 	3. Radio-ulnar joints.	
7. Structures passing deep to extensor retinaculum of hand and its deep relations 8. Arterial anastomosis around elbow joint 9. Boundaries and contents of femoral triangle Short answer (3x2=6) 10. Blood supply of mammary gland 11. Epiphysis 12. Transitional epithelium Draw diagrams (2x2=4) 13. Transverse section through middle of leg	5. Implantation	(5x3=15)
10. Blood supply of mammary gland 11. Epiphysis 12. Transitional epithelium Draw diagrams (2x2=4) 13. Transverse section through middle of leg	7. Structures passing deep to extensor retinaculum of8. Arterial anastomosis around elbow joint	f hand and its deep relations
11. Epiphysis 12. Transitional epithelium Draw diagrams (2x2=4) 13. Transverse section through middle of leg	Short answer	(3x2=6)
13. Transverse section through middle of leg	11. Epiphysis	
	Draw diagrams	(2x2=4)
