

Q.P. Code: 301001

Reg. no.:

**Third Professional MBBS (Part I) Degree Supplementary Examinations
August 2022**

Ophthalmology

Time: 2 Hours

Total Marks: 40

- *Answer all questions to the point neatly and legibly • Do not leave any blank pages between answers • Indicate the question number correctly for the answer in the margin space*
- *Answer all parts of a single question together • Leave sufficient space between answers*
- *Draw diagrams wherever necessary*

Essay:

(10)

1. A 70 year old male, diabetic and hypertensive, came with painless progressive diminution of vision in both eyes since about six months. His vision is counting fingers close to face in both eyes, not improving further with any glasses. There is a white reflex in the pupil in both the eyes and the fundus cannot be visualized.
 - What is the most probable diagnosis
 - What are the investigations you need to perform before operating on him
 - What are the types of surgeries which can be planned for him
 - Discuss the possible early post-operative complications of the surgery

(1+3+3+3)

Short notes:

(4x3=12)

2. Visual acuity testing.
3. Management of corneal ulcer
