

**Q.P. Code: 305001**

**Reg. no.: .....**

**Third Professional MBBS (Part II) Degree Supplementary Examinations,  
September 2017**

**General Medicine – I**

**Time: 3 Hours**

**Total Marks: 60**

- Answer all questions
- Draw diagrams wherever necessary

**Essay:**

**(2 x 10=20)**

1. 40 year old individual presented with fatigue, weight loss and upper abdominal discomfort. Clinical examination revealed hepatosplenomegaly and ascites. Answer the following:
  - What other history will you elicit to detect the possible etiology of his disease
  - What investigations will you do to evaluate his condition
  - How will you manage this case
  - What are the complications of this condition (2+3+2+3)
2. 35 year old individual was found to have mild pallor and BP of 160/100 mmHg on routine medical examination. On evaluation blood urea and serum creatinine were raised. Answer the following:
  - What is your probable diagnosis
  - What are the etiological factors for his renal condition
  - What complications or adverse effects can occur in this condition
  - What are the modalities of treatment available (2+3+3+2=10)

**Short notes:**

**(20x2=40)**

3. Management of hyponatremia
4. Neurological consequences of vitamin B<sub>12</sub> deficiency.
